

COASTAL PARK NOT CANALS

COASTAL PARK NOT CANALS

The Barnett Government's proposed private canal housing and inland marina development on public land at Point Peron must be stopped!

- The 1964 Point Peron Land Agreement stipulated that Point Peron's use is to be 'restricted to a reserve for recreation and/or parklands' and that the land must not be used 'for private industrial, commercial or residential development'.
- The canal estate proposal would require expensive and ongoing dredging of seagrass meadows which are feeding grounds of the threatened Little Penguin whose numbers have already plummeted to just 1000 in recent years.
- Canal estates of this type have been banned in other states because of their adverse economic and environmental impacts. According to a leading WA oceanographer the proposed Point Peron canal estate will not flush due to small tides in WA.
- Hasn't the WA Government learnt anything from the mistake they made when they approved the Port Geographe Bay canal disaster near Busselton which has already cost WA taxpayers over 30 million dollars to try and fix?
- This canal estate is not needed as there is already a suitable marina site approved for Rockingham that has wide community support.

Let's develop a world-class coastal conservation and recreation park on our public land instead.

Please join us in making Cape Peron Coastal Park a reality.
