

# Point Peron is under attack!

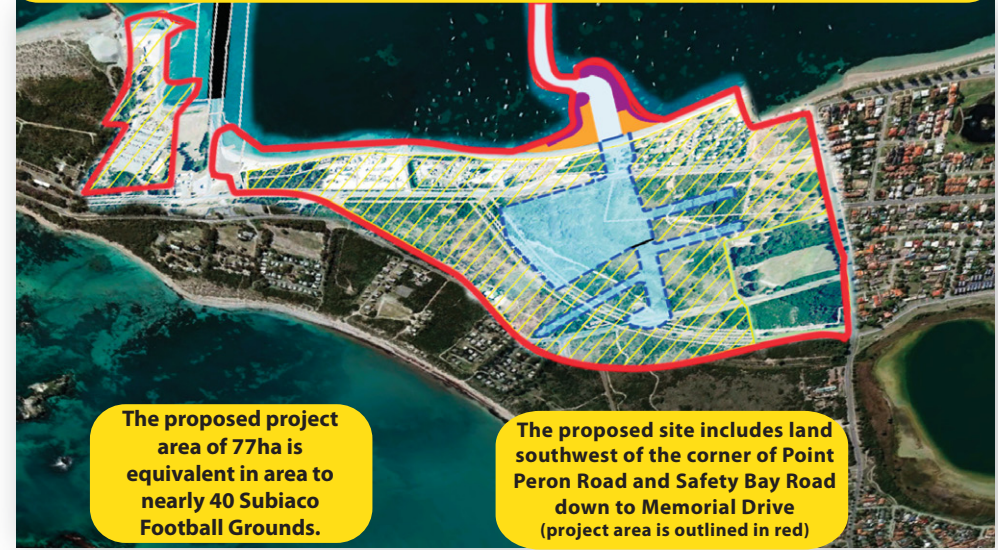

If the Barnett Government's proposed private canal housing and inland marina development at Point Peron goes ahead we risk impacts including;

- ✋ Reduced pedestrian access to the beachfront along Mangles Bay because the marina entry will **cut the beach in half** and beach walkers will have to walk around the canal housing development in order to get to the far side of the beach.
- ✋ **Damage** to juvenile fish nurseries and fish stocks due to **destruction of 6 ha of seagrass** from dredging the entrance channel.
- ✋ **Rate increases** to fund the ongoing dredging needed to keep the access channel open and for maintenance of canal seawalls (as has happened in Yunderup).
- ✋ Stagnant water due to poor flushing of the canals resulting in **reduced local property values**
- ✋ Dewatering during construction causing **bores within 1 km to dry up** and or become salty causing trees to die (as has happened in Mandurah)
- ✋ Bulldozing nearly one third of Point Peron's bushland, making the remaining habitat unviable for wildlife, and replacing the bushland with festering canals and **buildings up to 5 storeys high!!!**

SEE OVER FOR HOW YOU CAN HELP .....

**POINT PERON**

# Say **NO** to Canal Development and **YES** to Community Improvement

Let's clean up and make Point Peron a place where our coast comes **ALIVE** rather than where the **coast dies**.

We can have a world class coastal conservation & recreation park with nature walks bush trails, cycleways/walkways, picnic areas, BBQ's and lighting for our families to enjoy. Where we can fish, snorkel, swim and take beach and bush walks and enjoy nature.

**We can STOP this destructive development.**
